

Quality Policy

Stenger & Ibsen Construction (SIC) is proud to be a part of the value chain for the renewable energy sector. With our work, we are a part of the energy transition by delivering Balance of Plant (BoP), where we aim to offer qualitative and resource-efficient solutions. As a project-driven company, we work according to our customer's specifications, striving to provide the best solutions fitting their needs. Quality is a top priority in our industry, where the expected quality depends on the stakeholder's scope. The scope of quality varies; however, it is always expected that our operations are done "*right first-time*", meeting the expected quality. Our main ambition is to ensure we do not have any quality or scope related complaints after a project has been handed over.

- Quality is reflected in every aspect of SIC's operations and embedded deeply within the organization. We are committed to working towards zero defects in our projects, ensuring that our projects always meet the specific quality requirements.
- We always work preventively, ensuring quality controls in all significant aspects of the Balance of Plant work.
- Responsibility towards our employees, subcontractors, and suppliers, as the well-being of those, ensures quality and value in our operations, services, and solutions for our clients.
- Work towards continuously improve on BoP and E-BoP (*Electrical Balance of Plant*).
- Identify and evaluate potential quality risks to control and reduce these risks.
- Work in compliance with applicable legislation, regulations, and internal policies and procedures.
- All employees are provided relevant quality management training to ensure that the individual roles are aware of their responsibilities in implementing SIC's quality management policy and procedures.
- Delivering innovative, high-quality solutions to ensure continuous value for our clients. This includes developing and implementing best practices while providing customized solutions that meet our client's quality requirements.
- Offer professional- and educational opportunities to allow employees to improve and develop continuously.

This quality policy applies to the entirety of SIC as well as our subcontractors and suppliers. The policy is based on our company values and code of conduct, which constitute a central part of our management system.
